

Annual Report of the Biomedical and Life Science Circuits and Systems (BioCAS) Technical Committee 2015/2016

Compiled by Kea-Tiong (Samuel) Tang, Secretary of the BIOCASTC

1) Executive Summary

The Biomedical and Life Science Circuits and Systems (BioCAS) Technical Committee of the IEEE CAS society can look back on a very active year. The number of committee members has increased to 112 members. They have been involved in a large number of various activities advancing and promoting the field of BioCAS, as will be detailed in the following sections. The two major activities, the BioCAS conference and the IEEE Transactions on BioCAS (TBioCAS) are now well established and continue to attract great quality papers. For example, a total of 328 papers were submitted to BioCAS'15, a 22% increase compared to BioCAS'14, which was already a record year. The theme of the conference was a **"Engineering for Healthy Minds and Able Bodies"**, signifying the impact of biomedical circuits and systems on advanced research tools and new therapies for neurological diseases and cognitive disorders, as well as rehabilitation tools and assistive technologies for improving the quality of life for those with disabilities. TBioCAS entered its 10th year of existence, and over the years has emerged as the premier venue for publishing research advances and reviews at the interface between circuits, systems, biomedical engineering, bioinspired settings, or validated in clinical. 2015-2016 has again been a strong year for TBioCAS. Thanks to the efforts of the associate editors and reviewers, the average manuscript review took 41 days to reach a first decision, and 56 days to reach a final decision. Overall acceptance rate was just 24%. TBioCAS submissions rose another 9% to currently 300 submissions annually. The journal already has a very respectable impact factor of 2.9 for such a young publication.

The members of the BIOCASTC engaged in several noteworthy activities. BioCAS TC sent two representatives, Roman Genov and Tim Constandinou to represent "IEEE CAS Society Brain Research & Activities" at the IEEE BRAIN Initiative Workshop, Columbia University (New York, USA), 14 December 2015. Moreover, BioCAS TC has been successful in nominating two distinguished lecturers for each of the last two years 2015 and 2016. Currently DLs representing the BIOCASTC include Gianluca Setti, Maysam Ghovanloo, Julio Georgiou and Jie Chen. They have already traveled around the globe engaging the worldwide community to research activities of the BIOCASTC and the CAS society in general. As an example, Maysam Ghovanloo gave a series of very well attended talks in the month of Dec 2015 on Implantable and Wearable Microelectronic Devices at several universities in China.

Members were also instrumental in organizing and chairing of new workshops on emerging topics. For example, Pamela Abshire, Pedram Mohseni and Jennifer Blain-Christen will organize CASFEST on Lab-on-CMOS systems co-hosted along with ISCAS 2016 in Montreal. Another event organized by BIOCASTC members is BrainCAS, which is a two day post-conference workshop organized after BIOCASTC 2016 in China. Moreover members of the TC have also been key figures for major CAS events such as ISCAS. For example, Wouter Serdijn was General Chair and Philipp HÄfliger was Technical program chair for ISCAS 2015. Not to mention, that members of the TC are very active in editorial boards of several journals related to CAS and otherwise. Members of the TC have been prolific in generating intellectual property (patents) and starting new ventures (example, Eugenio Culurciello (TeraDeep).

Members have also gone on to receive numerous awards and recognitions. To name a few, Viktor Gruev won the IEEE Donald G. Fink award for best paper in any IEEE journal, conference or proceedings. Also, Chris Tomazou won the 2014-15 IEEE Biomedical Engineering Award.

While the executive summary just provided a brief sampling of the TC activities and achievements, please read below for the detailed report.

2) IEEE ISCAS 2016, Montreal, Canada

The biomedical circuits and system track had 123 submissions, which was a 19% increase from previous year submission, and is above average based on submissions from 2010-2015 (2015: 104; 2014: 120, 2013: 122, 2012: 163, 2011: 74, 2010: 85). It ranks No. 4 among the 13 tracks in ISCAS after Analog Signal Processing, CAS for Communications, and VLSI systems architectures and applications. Track chairs, Sameer Sonkusale, Julio Georgiou and Jennifer Blain Christen, coordinated the review process. 32 members from the BIOCAS TC helped to serve as RCMs and did a phenomenal job in providing efficient, high quality and timely reviews. A total of 489 reviewers were assigned, with an average of 4 reviewers per paper. The average review per paper submitted was 3.7, which is at par with other TCs. The result of the review process was an acceptance of 60 papers out of 123 submitted papers. The acceptance rate is 48%, which is also at par with the rest of the ISCAS. The accepted papers were assigned into 36 lecture and 24 poster presentations organized in 7 lecture and 3 poster sessions. 20 members from the TC volunteered to serve as session chairs for these sessions. Detailed statistics on the submission among different sub-tracks are listed below.

Track ID	Subject Areas	Submission	Acceptance
2.0	Biomedical and Life-Science Circuits, Systems and Applications	1	0
2.1	Wireless, Wearable, and Implantable/Injectable Technology	18	9
2.2	Medical Information- and Telecare Systems	6	2
2.3	Harvesting/Scavenging Energy for Biomedical Devices	11	6
2.4	Biometrics, Biomedical Signal Processing and Bioimaging Technology	15	7
2.5	Integrated biomedical systems, BioMEMS, Bio-sensors/actuators and lab-on-chip	20	7
2.6	Bio-inspired and Biomolecular Circuits and Systems	1	0
2.7	Circuits for Biomedical Systems	51	29
2.8	Other areas in biomedical and lifesciences circuits and systems	0	0
Total		123	60

The TC members also organized six out of twenty two special sessions at the conference (30%). Beyond the special sessions, the TC members also organized a CASFEST workshop held in conjunction with ISCAS on "Lab on CMOS Systems". The organizers for this CASFEST workshop were Pamela Abshire, Pedram Mohseni and Jennifer Blain Christen. CASFEST had 6 lecture and 6 poster presentations related to the theme of the workshop. Considering regular papers, special sessions and dedicated workshop, it is clear that BIOCAS TC has contributed at a very high level to the ISCAS this year. The track chairs (S. Sonkusale, J. Georgiou and J. Blain Christen) would like to thank all the authors, reviewers, RCM, session chairs for their time and effort spent to enhance the BIOCAS activities and to help make ISCAS a success.

As is customary, an award sub-committee was formed to vote on the best paper award for the BIOCAS track at ISCAS. This year (2016) winner was the paper titled "Battery-less Modular Responsive Neurostimulator for Prediction and Abortion of Epileptic Seizures", authored by Hossein Kassiri, Nima Soltani, M. Tariqus Salam, Jose Luis Perez Velazquez, Roman Genov. This award is given out at the IEEE BIOCAS TC meeting in ISCAS in Montreal.

3) IEEE Biomedical Circuits and Systems 2015 Conference, Atlanta, GA, USA

The 2015 international IEEE conference on Biomedical Circuits and Systems, BioCAS 2015, was organized by Prof. Maysam Ghovanloo and a team of some of the most active members in the CASS community in Atlanta, Georgia, USA. The conference venue was the historic Academy of Medicine in Atlanta Midtown right next to the Georgia Institute of Technology campus. The theme of the conference was a “**Engineering for Healthy Minds and Able Bodies**”, signifying the impact of biomedical circuits and systems on advanced research tools and new therapies for neurological diseases and cognitive disorders, as well as rehabilitation tools and assistive technologies for improving the quality of life for those with disabilities.

The IEEE BioCAS 2015 was one of the most successful editions in the history of this rapidly growing conference in terms of attracting contributions in the form of paper submissions from the active and thriving community of scientists, researchers, engineers, and post-docs, students, who are active in this field as well as the number of attendees. A total of 328 papers were submitted to BioCAS’15, a 22% increase compared to BioCAS’14, which was already a record year. Geographical representation of these submissions to the IEEE BioCAS 2015 have been depicted in the following image.

Out of these, 143 papers were accepted by the technical program committee for presentation at the conference, which plus the 20 invited papers, dropped the acceptance rate to below 50% in the history of the IEEE BioCAS. Moreover, 310 people registered for the conference, a record for the IEEE BioCAS, and more than 300 actually attended this full three-day single-track conference, which also included all the tutorial. The following image shows the distribution of various topics and areas that were presented in various IEEE BioCAS 2015 technical tracks.

In accordance with the multidisciplinary nature of the BioCAS conference, a series of highly informative keynotes and tutorials were organized by some of the pioneers of this field and related disciplines, details of which can be found on the BioCAS 2015 technical program page: <http://biocas2015.org/content/technical-program>

This year, we put specific effort in increasing the participation of medical device industry, which can help bridge the gap between laboratory research in academia and clinical practice by provide guidelines for future research directions by identifying area of high demand among the patient population for both academic faculty and young researchers, as well as opportunities for employment and collaborative hands-on research. This effort, led by Dr. Tim Denison from Medtronic, resulted in some veterans of the medical device industry accepting our invitation to offer a unique parallel workshop on "Lessons Learned on The Translational Highway" on the 2nd day of the conference by sharing their views and experiences on this key topic, followed by a short interactive panel.

Another unique event at the IEEE BioCAS 2015, which was very well received by the attendees, was the Gala Dinner Forum, which was held in the brand new Renaissance Atlanta Midtown Hotel. We will invited a panel of experts talking in a relaxed environment, over excellent food and drinks, about "The Most Important Problems to be Tackled by the BioCAS Community." In the Q&A session that will follow, the audience, particularly the younger aspiring researchers, were given a chance to further discuss these problems with the expert panel in order to identify the most impactful problems to tackle, those that are most worthy of their time, attention, and talent. Both of these events, which were fully attended even beyond the capacity of the venue, were highlighted in advance on the BioCAS 2015 conference website: www.biocas2015.org

Yet another highlight of the IEEE BioCAS 2015, which was also emphasized in earlier editions of the BioCAS by the steering committee, was the live demo session, which was very well attended and created a whole lot of interactions, effective exchange of ideas, and hands-on experiences among the attendees and presenters, who brought their fully functional prototypes literally from the other side of the world to Atlanta to showcase them. For the first time, the majority of these live demos were video recorded, and provided to the public on YouTube for promotion of the conference, and the benefit of the larger CAS society and anyone who might be interested in this field: <https://goo.gl/pyQYsb>

Similar to the year before, BioCAS 2015 was paperless except for the conference pamphlet, with all the abstracts and papers made available for download in the for my PDF filed in the Conference Proceedings during the conference in a password-protected fashion, as well as an App called "Conference4me". BioCAS 2015 was sponsored by the IEEE CAS, EMB, and SSCS (only technical) societies, as well as several patrons, such as the National Science Foundation, Medtronic Inc., and St. Jude Medical. Conference Catalyst Inc. was in charge of the logistics and registrations, while ePapers Inc. handled the paper submissions, cross-check, review process, and arrangement of the final program.

The BioCAS 2015 conference in Atlanta, GA certainly raised the bar to a new level by being a great event to bring many scientists, researchers, and young scholars from all around the world, representing the top academics and medical device industry together in order to promote fruitful discussions and contacts to foster research in the areas of electronic circuits and systems for biomedical applications and life sciences.

4) IEEE Transactions on Biomedical Circuits and Systems

Co-sponsored by the IEEE Circuits and Systems Society and IEEE Engineering in Medicine and Biology Society, the IEEE Transactions on Biomedical Circuits and Systems (TBioCAS) entered its 10th year of existence, and over the years has emerged as the premier venue for publishing research advances and reviews at the interface between circuits, systems, biomedical engineering, bioinspired settings, or validated in clinical.

2015-2016 has again been a strong year for TBioCAS. Thanks to the efforts of the associate editors and reviewers, the average manuscript review took 41 days to reach a first decision, and 56 days to reach a final decision. TBioCAS submissions rose another 9% to currently 300 submissions annually. Also, three annual special issues are managed (IEEE ISCAS: April, IEEE BioCAS: October, and IEEE ISSCC: December). The page budget was increased to 1200 pages (30% increase), with a proposed increase to 1,500 pages, and a monthly issue starting in 2017. Acceptance rate was 24% per submission or 38% per original submission.. The impact factor was stabilized recently at 2.9. Also, latest ranking from 2014-2015 was as follows: 25/274 by Journal Citation Report in electrical and

electronic engineering, 13/77 in biomedical engineering. The Article Influence Score rose to 1.396 (31/274 by JCR in EEE, and 7/77 in BE).

BioCAS community is urged to continue contributing to the success of TBioCAS as avid and frequent readers, inspiring and prolific authors, and critical but constructive and prompt reviewers. The following resources are available to the community:
